

# Introduction

Dear Customers,

Welcome to our 2010 catalogue. This past season has shown that people in our region continue more than ever to care about how their food is grown and how their homes look, in spite of economic hardship. This gives us all reason for a bright outlook in 2010 as we look forward to the continuation of this trend.

As you've come to see, this catalogue is much more than a list of the products we offer. Many of these products are on the cutting edge and, as such, are not as well understood as the normal "same-old" chemical products that have been the basis of ag and turf care for the past 60 years or more. Public perception is changing and the demand for more sustainable alternatives continues to climb. In order to help you better utilize these products, we've included usage ideas, pictures, technical information, frequently asked questions, and much more. In addition to the information presented here, we have developed Technical Bulletins which will help you with how to deal with your specific situation.

We look forward to taking care of your needs and talking with you about how we can service you this coming year.

Happy Growing,

*The Jolly Farmer Agricultural Team*
